This summary sheet provides information on tank-mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk.

Important Note: Do not use any tank-mix if the mixture cannot be applied within the recommendations for individual products or if specific tank-mix restrictions apply.

Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank-mix request please contact your local Corteva representative or call the Technical Hotline on 0800 689 8899

Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, PH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Spray able with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

Key

* Kerb Flo 500 in mixture with PGR fungicides, especially if the crop is under stress, may cause an additive PGR effect

† Recommended mixing order X-change then Kerb Flo 500 then Architect (BASF information)

NOTES:

OSR Herbicides? Think Water

A VI Stewardship Scheme to build on existing good practice to protect water and avoid restrictions on some key oilseed rape herbicides

Steps that can be taken to reduce any potential issues include;

- Use Whyby.co.uk to find out if any of your land is in a Drinking Water Safeguard Zone (DWSGZ)

- If you are farming in a DWSGZ, speak to your local water company catchment officer to understand the potential risk on a field-by-field basis, or speak to your agronomist.

- Implement best practice agronomy to help protect water. For propyzamide containing products please follow the advice given in the following VI information, <https://voluntaryinitiative.org.uk/media/1077/propyzamide2016july.pdf>
