

# PRINCIPAL FORTE TANK-MIX COMPATIBILITY IN FORAGE MAIZE Must be applied with an 95.0 % w/w oil (rapeseed triglycerides) adjuvant i.e. Codacide or Vivolt

### PLEASE ENSURE YOU READ THE NOTES SECTION BELOW This version supersedes all previous editions

Normal = Physically Compatible	Italics = Physically Compatible with Continuous Agitation	Red on Blue = Physically Incompatible
BOLD CAPITALS = Physically & Biologically Compatible	Bold Italic = Biologically compatible with Continuous Agitation	RED CAPITAL ON BLUE = CROP INJURY - INCOMPATIBLE
	Black on Orange = Do not mix as bacterial survival is severely impacted	

ADJUVANTS			
CODACIDE (1.0 l/ha)	Vivolt 0.2%		

## **BIOSTIMULANTS** Blue N + Vivolt

HERBICIDES					
Botiga		Dual Gold + Codacide/Vivolt		Shield Pro + Starane Hi-Load HL + Codacide*	
Barracuda <sup>#</sup>		Gyo + Codacide/Vivolt		Starane Hi-Load HL + Codacide*	
CALLISTO"		Laudis OD + Codacide/Vivolt		Wing-P + Codacide/Vivolt	
Diva + Codacide/Vivolt		Shield Pro + Codacide			

TRACE ELEMENTS - tested in mix with Codacide (1.0 I/ha OR Vivolt 0.2%)					
Amazinc		Foliar Potash		Mancuflo	
Biotrac		Glytrel MnP		Mantrac Pro	
Bortrac		Gramitrel		Molytrac	
Brassitrel Pro		Grow-Pro		Phosamco Bio	
Canola Bio		Kinsidro Grow+		Safe N	
Coptrel		Magflo 300		Seniphos	
Croplift Pro		Magphos		Stopit	
Equilibrium		Maize Boost		Thiotrac	
Ferleaf		Mancozin		Zintrac	

COMBINATION MIXES					
HERBICIDES + TRACE ELEMENTS					
Callisto #+ Kinsidro Grow+		CALLISTO + MAIZE BOOST#*		Starane Hi-Load HL + Calfite	

This summary sheet provides information on tank-mixes conducted with this product. Corteva Agriscience gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and

Important Note: Do not use any tank-mix if the mixture cannot be applied within the recommendations for individual products or if specific tank-mix restrictions apply.

Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank-mix request please contact your local Corteya representative or call the Hotline on 0800 689 8899.

Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, pH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Sprayable with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

"Do not use with an adjuvant, due to partner label restrictions. Requires the addition of an anti-foam agent. \*Do not apply if the crop is under stress

### MIXING INSTRUCTIONS

MIXING INSTRUCTIONS.
Half fill the spray tank with clear water and start the agitation.
Pour in the required amount of PRINCIPAL FORTE.
Rinse any empty ontainers throughly and add rinsings to the spray tank.
Where tank-mixes are used, and unless directed otherwise, the preferred order of addition of products to the spray tank is as follows: water dispersible granules, wettable powders, suspension concentrates (flowables), emulsifiable concentrates, solution concentrates. Each product should be added separately to the half-full sprayer and be fully dispersed before the addition of the next product.
Add the remainder of the water.

Add the remainder of the water. Finally, add the required amount of adjuvant and continue agitation. Maintain agitation until spraying is completed. Spray solution MUST be used on the day of mixing and must NOT be left overnight. Follow manufacturer recommendations regarding correct use of the induction bowl.

Please note:
Direct contact of WGs with non-diluted tank-mix partners must be avoided.
The above supersedes the instruction on the Codacide label and so negates the need for pre-mixing.

KEY CHANGES
Starane Hi-Load HL now approved for use with Principal Forte.; 21May 25 - addition of Kinsidro Grow+ and in mix with Callisto

USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.
