HERBICIDES					
Callisto†		Starane Hi-Load HL			

ADJUVANTS					
Vivolt 0.1%					

TRACE ELEMENTS					
Manifol Excel		Mancozin		Zintrac 700	
Magphos K		Mantrac Pro			

This summary sheet provides information on tank-mixes conducted with this product. Corteva Agriscience™ gives no warranty or accepts no liability in respect to compatibilities that are beyond the label. This additional information is for guidance purposes only and use is at grower's risk.

Do not use any tank-mix if the mixture cannot be applied within the recommendations for individual products or if specific tank-mix restrictions apply.

Larger, more complicated mixes; unlisted mixes or replacing alternative products to those listed in this table are not endorsed. However, for further information or to register a tank-mix request please contact your local Corteva representative or call the Technical Hotline on 0800 689 8899

Physical compatibility data is based on the results of an industry recognised standard test. Be aware that in the field, water hardness, PH, temperature etc. can vary. Biological compatibility data are based on a small number of field trials, Corteva Agriscience™ cannot warrant the efficacy of other tank-mix partners. Where only Physical Compatibility or Spray able with Continuous Agitation is shown, Corteva Agriscience™ has no biological data regarding efficacy or crop safety and only has data on physical compatibility, so growers use these mixes at their own risk.

**Do not apply Titus in sequence or tank-mixture with a product containing any other sulfonyleurea.**

Key to Notes

† No adjuvant required as the Callisto label advises that it is not needed

Changes April 25:

Added: Starane Hi-Load HL, Vivolt

Removed: Butryflow
