## Key benefits

- Excellent control of wild oats, ryegrass and brome species as well as a wide range of broad-leaved weeds.
- There are no specific cultivation requirements for following crops and excellent following crop profile. No need to plough before winter oilseed rape (except metsulfuron-methyl sequence – see label).
- Physically compatible with a wide range of herbicides, insecticides and trace elements making it an excellent tank mix partner.

## Best use advice - autumn

- Apply Broadway Star at 265 g/ha with a Corteva Agriscience supported adjuvant:
  - Activator 90, Biopower, BioSyl, Headland Fortune, Kantor, Torpedo II
- Sterile and great brome control is best achieved in the autumn - Apply Broadway Star in a programme following an effective pre-emergence herbicide, in tank mix with a residual partner when brome is between GS11-24 (optimal GS11-13) - see reverse.
- Ryegrass (from seed) control is best achieved GS11-29.
- Wild oat control is best achieved GS11-29.
  - Also, good activity on tame oats optimum GS11-24 – Best control achieved pre-tillering in the autumn.
  - Varietal differences in sensitivity/optimal timing consult Corteva Agriscience for latest varietal information.
- To avoid subsequent injury to crops other than wheat, rye and triticale, spray equipment used for Broadway Star applications should be thoroughly cleaned with All Clear Extra.
- Crops that can be sown after a crop treated with Broadway Star:
  - Autumn: Winter wheat and barley, winter oats, winter triticale, winter rye, oilseed rape, grass, winter beans, brassica plants as transplants.
  - Spring: Spring wheat, spring barley, spring oats, triticale, rye, spring oilseed rape, sugar beet, potatoes, grass, clover (as part of a grass/clover ley), beans, peas, maize, linseed, brassica plants as transplants, carrots, parsnips.
